NGUYEN TRUONG ANH TUAN

SOFTWARE ENGINEERING STUDENT | PYTHON | COMPUTER VISION

Ho Chi Minh City, Vietnam | +84 348 021 904 | nguyenzatuan58@gmail.com
linkedin.com/in/anh-tuan-nguyen-truong-980404338 | github.com/Anhtuan2005

PROFESSIONAL PROFILE

Software Engineering student focused on real-time computer vision systems with Python, YOLO11, ByteTrack, InsightFace, OpenCV and FastAPI. Hands-on experience with multi-camera pipelines, identity stabilization, CPU/GPU workload separation, alert workflows and automated testing. Seeking computer vision or applied AI opportunities.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, SQL, HTML5, CSS3
Computer Vision: YOLO11, ByteTrack, InsightFace, OpenCV, object detection, multi-object tracking, face recognition
Frameworks & Data: FastAPI, ASP.NET Core 8 MVC, Entity Framework Core, SQL Server, SQLite, REST APIs
Engineering: Real-time video processing, multi-camera pipelines, automated testing, logging, API design

SELECTED PROJECTS

SCT CAMERA | REAL-TIME AI SURVEILLANCE SYSTEM — 04/2026 - 08/2026

STACK Python | FastAPI | YOLO11 | ByteTrack | InsightFace | OpenCV
GITHUB github.com/Anhtuan2005/SCT_Camera

- Independently designed and built a multi-camera pipeline for 3 source types: webcam, local video and RTSP.
- Architected isolated per-camera workers around YOLO11 detection and ByteTrack tracking, exposed through a FastAPI MJPEG dashboard.
- Engineered 2 identity-stability mechanisms - per-track face caching and camera motion compensation - for more stable tracking.
- Separated InsightFace CPU inference from the YOLO GPU workload to reduce resource contention during multi-camera processing.
- Implemented 6 alert workflows: intrusion, loitering, line crossing, falls, unknown persons and suspicious theft or missing assets.
- Delivered 20+ authenticated dashboard and API routes for camera, ROI, counting-line, alert-history and YAML configuration workflows.
- Hardened 2 notification channels - Telegram and Discord - with 3 delivery safeguards: cooldown, deduplication and retry; validated core workflows with 180 passing automated tests.
- Automated 3 operational safeguards - SQLite migrations, persistent logging and graceful shutdown - to release camera resources and background alert workers safely.

TECHVORA | FULL-STACK E-COMMERCE APPLICATION — 02/2026 - 04/2026

STACK ASP.NET Core 8 MVC | EF Core | SQL Server | JavaScript
GITHUB github.com/Anhtuan2005/E-Lectrical--Commerce-

- Independently designed and built a Vietnamese e-commerce application using ASP.NET Core 8 MVC, Razor, EF Core, SQL Server and vanilla JavaScript/CSS.
- Delivered 10+ customer workflows spanning search, filtering, pagination, AJAX cart and wishlist, accounts, vouchers, checkout and order history.
- Integrated 2 payment methods - COD and VNPay sandbox - with webhook validation and consistent payment-to-order lifecycle handling.
- Centralized 8 administration domains covering revenue analytics, catalog, inventory audit logs, users, promotions, reviews, shipping and order management.
- Applied 3 protection layers across account, checkout and administrative flows: ASP.NET Core Identity, rate limiting and server-side validation.
- Instrumented 3 critical event categories - payment callbacks, operations and application errors - with structured Serilog logging.

EDUCATION & CREDENTIALS

Ho Chi Minh City University of Foreign Languages - Information Technology — **06/2023 - 04/2027**
Bachelor of Information Technology | GPA: **3.16/4.0** | IELTS: **6.5**
Relevant Coursework: Software Engineering, Web Development, Database Management, Computer Networks
