NGUYEN TRUONG ANH TUAN

INFORMATION TECHNOLOGY STUDENT | PYTHON | COMPUTER VISION

Ho Chi Minh City, Vietnam | +84 348 021 904 | Nguyenztuan58@gmail.com
www.linkedin.com/in/anh-tuan-nguyen-truong | github.com/Anhtuan2005

PROFESSIONAL PROFILE

Information Technology student focused on real-time computer vision systems with Python, YOLO11, ByteTrack, InsightFace, OpenCV and FastAPI. Hands-on experience with multi-camera pipelines, identity stabilization, CPU/GPU workload separation, AI benchmarking, behavior evaluation and automated testing. Seeking computer vision or applied AI opportunities.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, SQL, HTML5, CSS3
Computer Vision: YOLO11, ByteTrack, InsightFace, OpenCV, object detection, multi-object tracking, face recognition
Frameworks & Data: FastAPI, ASP.NET Core 8 MVC, Entity Framework Core, SQL Server, SQLite, REST APIs
Evaluation & Engineering: Precision, recall, F1, false-alarm analysis, FPS/latency benchmarking, multi-camera pipelines, automated testing

SELECTED PROJECTS

SCT CAMERA | REAL-TIME AI SURVEILLANCE SYSTEM — 04/2026 - 08/2026

STACK Python | FastAPI | YOLO11 | ByteTrack | InsightFace | OpenCV
GITHUB github.com/Anhtuan2005/SCT_Camera

- Independently built isolated per-camera workers for webcam, local video and RTSP around YOLO11, ByteTrack and FastAPI MJPEG streaming.
- Benchmarked a 720p YOLO11s + pose pipeline on RTX 3050 over 3 x 15-second runs: **26.5 FPS** for 1 stream (35.2 ms median AI latency); **27.6 FPS total** for 4 streams (**6.9 FPS per stream** on average).
- Engineered 2 identity-stability mechanisms - per-track face caching and camera motion compensation - for more stable tracking.
- Evaluated five behaviors separately on P01 and P02 10-clip tests in a 40-clip pilot: loitering TP/FP/FN = 1/0/0 (P01) and 1/2/0 (P02). Full per-behavior results and protocol differences in the project README.
- Delivered 20+ authenticated dashboard and API routes for camera, ROI, counting-line, alert-history and YAML configuration workflows.
- Built Telegram and Discord alerts with cooldown, deduplication and retry; validated core workflows with **208 passing automated tests**.
- Automated 3 operational safeguards - SQLite migrations, persistent logging and graceful shutdown - to release camera resources and background alert workers safely.

TECHVORA | FULL-STACK E-COMMERCE APPLICATION — 02/2026 - 04/2026

STACK ASP.NET Core 8 MVC | EF Core | SQL Server | JavaScript
GITHUB github.com/Anhtuan2005/E-Lectrical--Commerce-

- Built an ASP.NET Core MVC storefront with EF Core and SQL Server, covering checkout, orders and administration.
- Used SQL Server transactions for checkout, stock and vouchers; implemented COD and VNPAY sandbox payment callbacks.
- Added Identity access controls, rate limits and structured logging; **82 .NET tests passed** against SQL Server, including duplicate callback and stock contention cases.

EDUCATION & CREDENTIALS

Ho Chi Minh City University of Foreign Languages - Information Technology — **06/2023 - 04/2027**
Bachelor of Information Technology | GPA: **3.16/4.0** | IELTS: **6.5**
Relevant Coursework: Software Engineering, Web Development, Database Management, Computer Networks
