NGUYEN TRUONG ANH TUAN

INFORMATION TECHNOLOGY STUDENT | .NET | BACKEND | PYTHON

Ho Chi Minh City, Vietnam | +84 348 021 904 | Nguyenztuan58@gmail.com

www.linkedin.com/in/anh-tuan-nguyen-truong | github.com/Anhtuan2005

PROFESSIONAL PROFILE

Information Technology student building backend applications with ASP.NET Core and Python. Hands-on experience with REST APIs, SQL data modeling, authentication, payment and order workflows, background processing, structured logging and automated testing. Seeking backend or .NET software engineering opportunities.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, SQL, HTML5, CSS3
Frameworks & Data: ASP.NET Core 8 MVC, Entity Framework Core, FastAPI, SQL Server, SQLite, Razor, REST APIs, AJAX
AI & Tools: YOLO11, ByteTrack, InsightFace, OpenCV, pytest, Git, Serilog, VNPay
Engineering: API design, authentication, automated testing, logging, data modeling, background processing

SELECTED PROJECTS

TECHVORA | FULL-STACK E-COMMERCE APPLICATION — 02/2026 - 04/2026

STACK ASP.NET Core 8 MVC | EF Core | SQL Server | JavaScript
GITHUB github.com/Anhtuan2005/E-Lectrical--Commerce-

- Built an ASP.NET Core 8 MVC application with EF Core and SQL Server for catalog, checkout, orders and administration.
- Protected checkout, inventory and voucher updates with SQL Server transactions and conditional stock writes; tested last-item contention between customers.
- Implemented COD and VNPAY sandbox payments; validated callback signatures and amounts, and handled duplicate or late callbacks without repeating payment state changes.
- Secured account and admin flows with ASP.NET Core Identity, role checks, anti-forgery validation and rate limiting; added structured Serilog logging.
- Passed **82 .NET tests** against SQL Server, covering stock races, duplicate payment callbacks, password reset and admin access changes.

SCT CAMERA | REAL-TIME AI SURVEILLANCE SYSTEM — 04/2026 - 08/2026

STACK Python | FastAPI | YOLO11 | ByteTrack | InsightFace | OpenCV
GITHUB github.com/Anhtuan2005/SCT_Camera

- Built isolated per-camera workers for webcam, local video and RTSP inputs, with separate capture, inference and tracker state.
- Exposed MJPEG streams and authenticated FastAPI dashboard/API routes for camera configuration, ROI, counting lines and alert history.
- Added asynchronous Telegram/Discord alert delivery with cooldown, deduplication and retry; stored alert history in SQLite.
- Automated SQLite migrations, persistent logging and graceful shutdown for camera and alert workers; passed **208 automated tests**.

EDUCATION & CREDENTIALS

Ho Chi Minh City University of Foreign Languages - Information Technology — **06/2023 - 04/2027**
Bachelor of Information Technology | GPA: **3.16/4.0** | IELTS: **6.5**
Relevant Coursework: Software Engineering, Web Development, Database Management, Computer Networks
